About ISCEA

ISCEA, The International Supply Chain Education Alliance, conducts many workshops to improve the knowledge of Manufacturing and Service industry professionals worldwide. ISCEA's mission is to be a single source for Total Supply Chain Knowledge through Education, Certification, and Recognition. ISCEA is the developer of internationally recognized certification programs of Certified Supply Chain Manager (CSCM), Certified Supply Chain Analyst (CSCA), Certified Lean Master (CLM), and Certified RFID Master (RFIDSCM). ISCEA is the governing body for the Ptak Prize. ISCEA members typically hold mid to upper supply chain management positions in Global 2000 companies.

ISCEA CLSSYB

This training is quite expensive and requires a large time commitment for training which generally includes validation projects. The idea that Black Belts and Master Black Belts would in turn teach and educate project sponsors (investors) and project members on the team so that they could become "yellow belts" has historically been overlooked.

We feel that by overlooking this has increased the risk of failure to many organizational Six Sigma initiatives. The foundation of a Six Sigma company is knowledge management and it is crucial that everyone understands how Six Sigma works and how they can provide value. Also, many plant managers, middle level managers and executives who are asked to invest as sponsors to Six Sigma have not been provided information to make the investments.

The ISCEA Lean Six Sigma Yellow Belt presentation and instruction will provide an overall insight to the techniques of Six Sigma, its metrics, and basic improvement methodologies. As a certified Yellow Belt you will be capable of participating as a core team member or subject matter expert on a project within your company. In addition, Yellow Belts are often responsible for running smaller pro-cess improvement projects using their Six Sigma tools and methodology.

ISCEA CLSSYB will help employees to foster buy-in to the Six Sigma tools, enhance day-to-day workplace activities seeking reduction in

cycle-times, improved quality, and less waste. Six Sigma Yellow Belt training provides an introduction to process management and the basic tools of Six Sigma, giving employees a stronger understanding of processes, enabling each individual to provide meaningful assistance in achieving the organization's overall objectives. Yellow Belt certification provides the stepping stones for further Green Belt and Black Belt Certification.

Learn how to use these important Six Sigma Tools and be able to put them to use right away:

1. Voice of the Customer
2. PDCA (Plan, Do, Check, Act)
3. SIPOC (Suppliers, inputs, process, outputs, customers)
4. DMAIC (Define, Measure, Analyze, Improve and Control)
5. RCA (Root Cause Analysis)

CLSSYB Program includes:

- 4 hours of classroom instruction led by an experienced supply chain management expert
- A study guide with all the slides and exercises
- 1 hour CLSSYB exam

This program is ideal for:

Those getting started in the lean domain.

Anyone that comes into contact with plants/ manufacturing.

Anyone that is interested in learning how six sigma applies to quality and practical industry exposure.

Anyone that wants to become a green/black and master black belt in the future and pursue a career in lean supply chain management.

CLSSYB Exam cover these areas:

- CSSYB – Analyze/Improve
